Global Shift in Thinking – The 1% Rule

via Ann McGill – 04/10/08

As you read, keep in mind this essential truth.

The bigger the vision and the more you believe in its possibility, the more likely it is to happen, sooner and more easily.

The more you hang out in doubt or disbelief and denial, the more you slow progress down – your own and everyone else's

Great News!

The **Global Evolution** that has been **forecasted for thousands of years** by increasing numbers of sages ... and more recently confirmed by scientists and visionary forecasters ... can now be proven to be actually happening. The turning point has been reached. The tipping point has been breached. **We are now in the process of birthing ourselves into a brand new way of being.** Life is gonna get a whole lot better ... eventually ... better than anything we've so far known. This possibility is guaranteed.

How do I know this is so? Let me explain.

A New History

The history of man is a history of suffering. Now, for the first time in the history of mankind, not just a few wise sages and spiritualists – Jesus, Mohamed and Buddha – Ramana Maharshi, Amma, the Dalai Lama – but **everyday people like you and me are learning to let go of suffering as a way of life.** Ever increasing numbers are experiencing ever greater inner peace, joy and happiness, a deepening connection with life and self.

People are Waking Up. Discovering - **realizing new truths.** Sharing and talking about what they have learned, spreading the word.

The 1% Rule

It takes but 1% of the population to set everyone – the collective whole – on a brand new course. **When 1% of the population holds the same thought** – shares similar thinking – **that thought or idea cannot be stopped.**

Thanks to Oprah Winfrey and her *The New Earth* show with Eckhart Tolle, more than 11 million people around the globe (as of 4/1/08) have been actively participating in the same conversation – about the causes of suffering and how to let go.

This means **more than 1% of the all the people on planet earth** are now exploring the same new ideas together. It means the long anticipated **Global Shift in Consciousness has grown into a “It's Now Happening”** –

"It Can't Be Stopped" change in the way people think and behave. As ever greater numbers learn to bring more peace, joy, love and abundance into their lives, positive momentum will continue to build until the desired new reality is at last achieved.
